Duncan Ripcord Spin Top: The Top That Anyone Can Master!

Spin tops are one of the oldest toys in the world, and yet have traditionally been difficult to learn and master. Duncan's team of engineers has created a style of spin top that can shatter the learning curve completely!

Designed to be used in the traditional manner, where the player winds a string around the top and throw it to make it spin, the Ripcord top also has a second spinning option. Players can use the included launcher and ripcord to get the Ripcord Spin Top whizzing into action with only one quick pull!

Manufactured from high-impact polycarbonate plastic, the Ripcord Spin Top is both durable and perfectly balanced. Included with the top are the ripcord and launcher, as well as a pair of spare tips, and a string and button for traditional-style top play.

The Ripcord Spin Top has been used by World Champions, and was designed with input from U.S. National Yo-Yo Master and World Spin Top Finalist, Steve Brown. Perfect for beginning to advanced players, the Ripcord is the only spin top in the world that actually allows the players to progress at their own speed, from absolute beginner to World Champion.

For more information on the Ripcord or any other Duncan products, contact Steve Brown at the contact information above.
